Aluminum used is 99.99% and pure aluminum-silicon 85% and only approximately 1000 ppm Fe. Fe is added just before the gas and is added continuously with 0.2% pure iron after the silicon goes through the ladle into the furnace. It was the first law in the state, and it was the first law in the state. It was the first law in the state, and it was the first law in the state.
